What to Expect

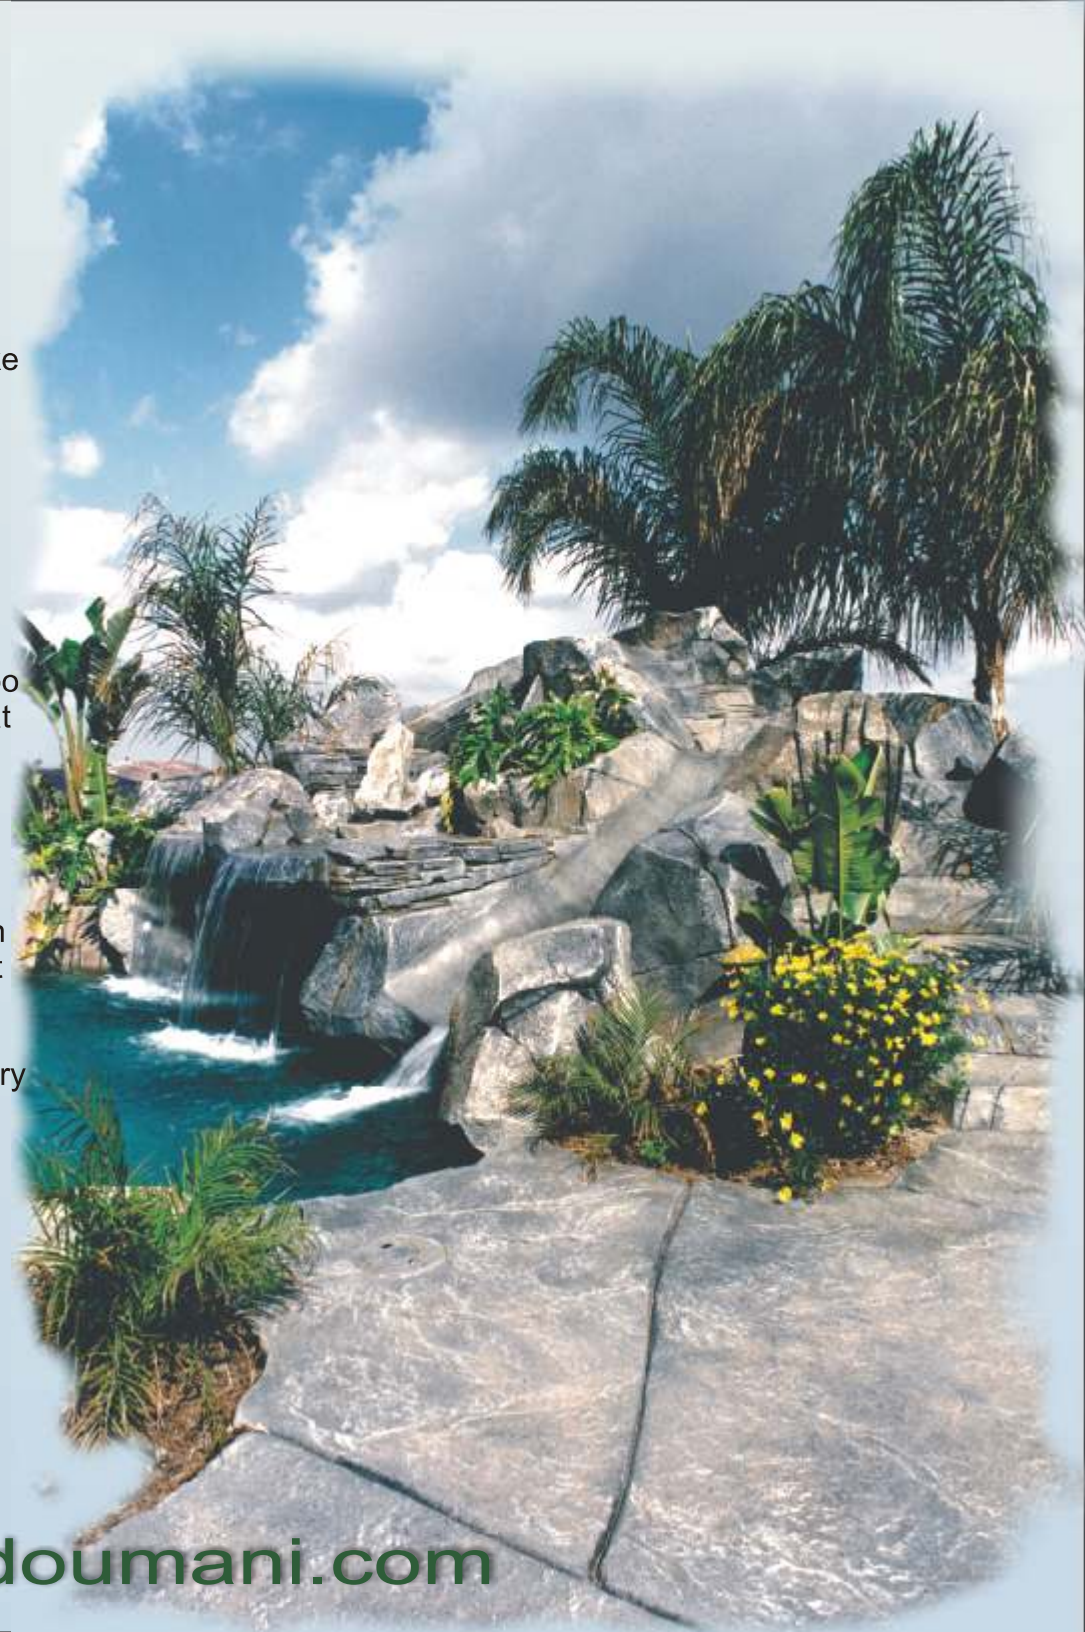

All TDC projects follow a well-defined process. By following a process, we can ensure that all of your requirements are met and that the project follows a predictable time schedule. In fact, most TDC projects take 8 to 10 weeks to complete.

Our designs are works of art in themselves. Hand-drawn and colored, TDC plans help you "see" the pool in your yard before a shovel of dirt is moved. Each plan has detailed descriptions of each pool and garden feature including the suggested plantings for all areas.

Unlike other pool contractors who attempt to complete too many projects at once, Sunset only takes on projects that we can complete while maintaining the highest levels of professionalism and care. We don't try to "sell out" our "dig days." Instead, we plan from project to project...and let the 'dig days' fall where they may.

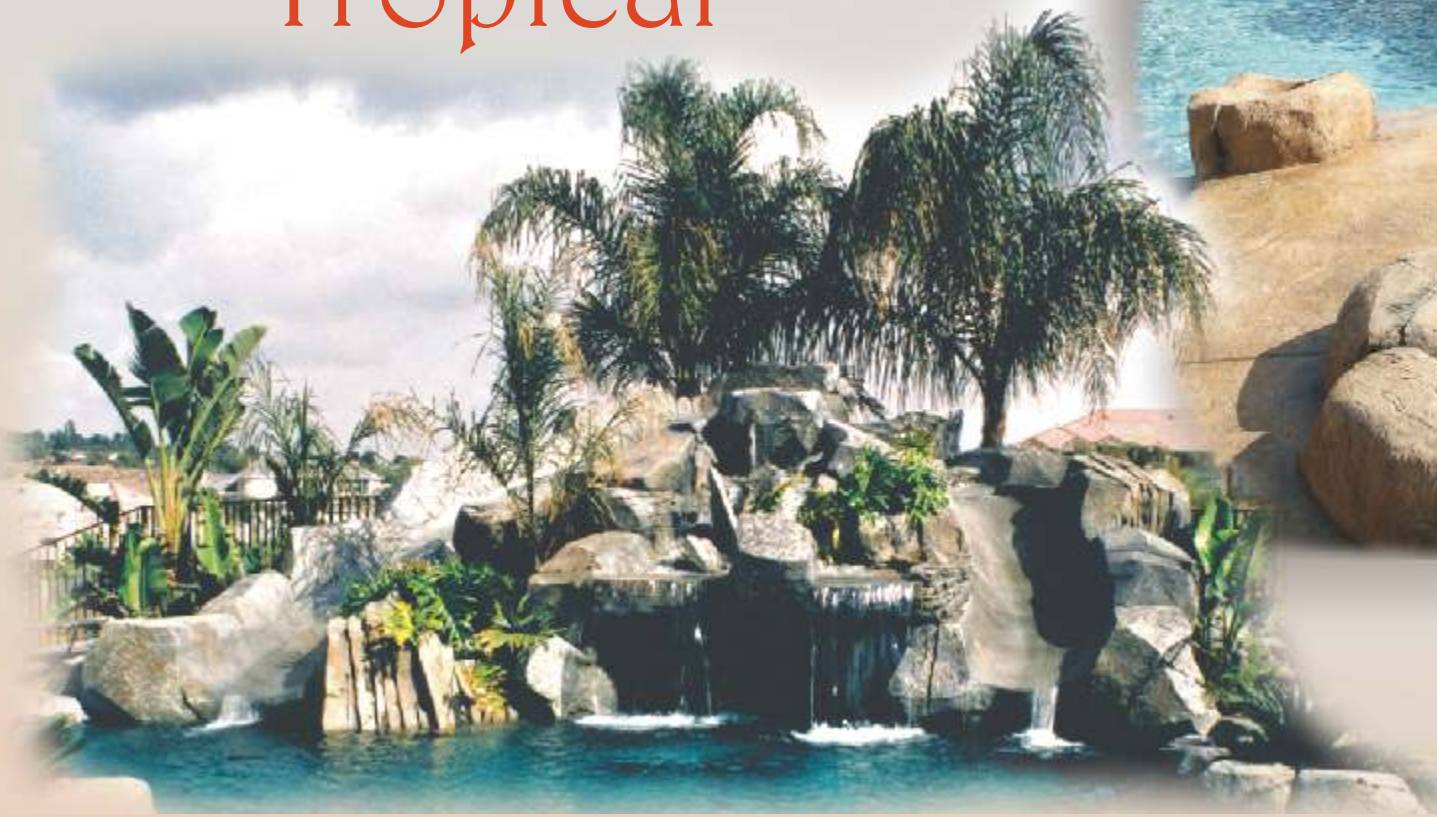

We realize that process landscaping and pool installation are difficult for you, as a homeowner. Our crews arrive at a normal time in the morning (no rude awakenings by power equipment at 6 am). If workmen will be at your home for an extended period, we provide our own sanitary facilities. You'll never have to worry about muddy work boots in your home from TDC crews.

Employees of our company all have workman's comp. & liability insurance
